

Sprint 1 Progress

Frontend

1. Created the main page where the user chooses his status and identity as a user. (whether he is a visitor, place owner, agent or hospital)
2. Created a login form for the visitor (email or phone number and password to log in)
3. Created a registration form for the visitor (name, address, City, email and or phone, password etc..)
4. Created a login form for the place owner
5. Created a registration form for the place owner

Backend

1. Store the registered visitors and place owners in the data base
2. Login Authentication for the visitors and place owners that enter the right credentials that match
